

Updated Quarantine Protocol *as of January 11, 2022*

Parents and faculty members will report positive Covid-19 cases to the school and keep children at home when they manifest any Covid-19 or flu-like symptoms or have a temperature of 100 degrees or higher. Parents are advised to seek medical guidance or Covid-19 testing whenever a child presents with Covid-19 symptoms. Influenza often has similar symptoms and so **we strongly implore you to keep your children home when presenting with any symptoms of illness.**

Positive Test

5 days isolation (for asymptomatic persons)

5 days of mask wearing

MANDATORY

If symptoms are still present after day five, then the individual must be symptom free for 24 hours prior to returning to work or school.

"Close Contacts"

Unvaccinated:
Isolate/quarantine at home for four (4) full days

Test on day 4

Please send test results to the school

If the COVID-19 test is negative and student has no symptoms, the student may return to school on the 5th day.

Fully vaccinated (2 shots): Will not have to quarantine at home, but will be highly encouraged to wear an N-95 mask (or an available mask) for 5 days.

Parents will determine whether their child will wear a mask at school. **Unless a student has tested positive or has been considered a close contact.**

Please note the most common symptoms are: cough, sinus, headaches, congestion, body aches, fatigue, loss of taste/smell, fever, etc.

Schools remain committed to hand sanitation, awareness of social distancing, air ventilation, and regular cleaning of the school as mitigation to virus spread. Additional consideration will be given to the concept of cohorts to minimize the risk of exposure to larger groups of students. Schools will continue to alert parents of positive cases at schools and notify students and families of close contacts.
